“MEU” Students Practice their Formal Writing and Speaking Skills During University Workshop

Amman – Students of the English Language and Literature Department at the Middle East University practiced practical application of formal writing and speaking techniques.

The workshop was held in collaboration with Talal Abu-Ghazaleh Organization, and aims to equip students with the necessary tools they need to excel in their academic endeavors, as well as provide them with a competitive advantage that extends beyond their university studies.

The workshop was supervised by the Head of the English Department at the Faculty of Arts and Educational Sciences at the University, Dr. Nosaybah Awjan, and focused on providing students with advanced skills in the world of academia. This is especially important because of the various forms of communication students are exposed to, which require them to master the art of formal writing for the purpose of drafting research

papers, submitting academic articles, or engaging in professional interactions.

The workshop provided its participants with strong formal writing skills that allow for the expression of complex ideas and the presentation of coherent facts. Such skills will help students transition from the university space to the professional world, a transition which requires them to re-shape their communication skills to suite a more formal and professional environment.

In this regard, Dr. Awjan said that this workshop is an investment for the university’s students, as it improves their academic capabilities, provides them with competitive advantages, and prepares them for future career endeavors. She added that it will make them influential figures that positively contribute to the fields they choose, and positively shape their future and the lasting effects it has on the world.

Significant Contributions by “MEU Media” Student at Al-Hussein Youth City

Amman – The contributions of “MEU Media” Students caught the eyes of many participants during the second edition of the “Young Sports Journalist” course. The course was held at Al-Hussein Youth City, and spanned over 3 days.

The course was organized in collaboration with the Jordan Olympic Committee, and took place at the Generations for Peace headquarters. This course represents the university’s endeavors in providing its students with valuable educational experiences, setting them up for professional success, and exposing them to the latest research and global perspectives in this very dynamic and inter-related world.

In this regard, faculty member at the Faculty of Media at Middle East University Saddam Al- Mashaqbeh said that the university is concerned with preparing its students to become journalists who specialize in important areas such as economy, sports, and climate change, among other areas of concern to local and global public opinion.

In turn, the students expressed that this course provided them with a closer look at effective techniques in interviewing, creating sports reports, journalistic writing, and multi-media story telling. The students added that the course helped them gain important skills which will help them excel in this dynamic and competitive field.

The course included lectures given by a number of specialists in the field of sports journalism, along with many themes and activities for the students to participate in.

“MEU Pharmacy” Students Develop their Skills in the field of Biotechnology During Panel Discussion

MEU Pharmacy” Students Develop their Skills in the field of Biotechnology During Panel” Discussion

Amman - Students of the Faculty of Pharmacy at the Middle East University spoke with the representative of the Geno Discovery Eng. Abdullah Al-Omari, and took a look at the PCR .technology used in the field of biotechnology

The panel discussion was organized by the University's Consulting and Training Center, and aimed to provide its students with knowledge that will propel the industry to more advanced levels of innovation, specifically in genomics related to DNA sequencing, proteomics related to the study .of protein varieties and types, and the modified genetic engineering of the organism structure

In this regard, the panel focused on this technology in relation to molecular biology, genetics, forensics, and medical diagnostics, where polymerase chain reaction (PCR) allows us to obtain millions of copies of a specific part of DNA, opening up many possibilities for scientific research .and practical applications

The panel discussion addressed the pivotal role of PCR in diagnosing genetic disorders, identifying pathogens, detecting infectious diseases, as well as its ability to amplify small DNA samples used .in solving complex criminal cases and ensuring justice

The students said that this panel discussion enabled them to learn about their roles in the fields of research and development, pharmacogenomics, and quality control. They added that it provided them with valuable insights into the types of polymerase chain reaction and their importance, as .well as incredible opportunities for pharmacists in the field of biotechnology

“MEU” Maintains its Progress in the Times Higher Education Impact Ranking Despite Increase in Participants

MEU

جامعة الشرق الأوسط
MIDDLE EAST UNIVERSITY

Amman - Jordan

Amman – The results of the Times Higher Education Impact Ranking show that the Middle East University has made significant progress in its efforts that meet the sustainable development goals and the criteria of this ranking, which ensure that it remains in the best (601800-) global universities category.

The university ranked second at the private universities level, and third at the Jordanian universities level this year in the fields of poverty eradication, quality of education, clean energy, climate action, partnerships, equality, peace and justice, and strong institutions.

The ranking witnessed an increase in the number of participating universities, bringing the number to 1591 participating universities compared to 1406 universities last year, with 185 new universities participating this year.

In this regard, the University President Prof. Salam Al-Mahadin expressed her happiness about this achievement, which is a testament to the collective efforts and unwavering commitment of the entire university community.

She added that the achievement is a reflection of the university's dedication to providing world-class education, promoting advanced research, and positively impacting our society.

She stressed that this ranking serves as a beacon of excellence in higher education, and explained that the participating universities are evaluated according to various criteria, including academic reputation, research outputs, faculty quality, student satisfaction, and global expectations.

In turn, the Director of the Accreditation, Quality, and Information Center, Dean of Law, Prof. Ahmed Al-Lozi stated that this achievement reminds us that the journey should not stop here, and stressed that it is necessary to continue pushing boundaries, striving for excellence, and making a lasting impact.

For his part, the Head of the Accreditation and Classifications Department Dr. Yazan Abu Eisheh explained that these results and solid reputation serve as an attraction for faculty members,

researchers, and talented students from all over the world, which fosters a diverse and vibrant academic community. He also noted that such accomplishments increase the opportunities of cooperation with other renowned institutions, and attract partnerships with industry leaders.

The ranking of the Middle East University in the “No Poverty” criterion rose up from the category (301400-) to the category (101-200), the “Quality of Education” criterion rose up from the category (601800-) to the category (401-600), the “Affordable and Clean Energy” criterion rose up from the category (201300-) to the category (101200-), the “Climate Action” criterion rose up from the category (201300-) to the category (401-600), and the “Partnerships For The Goals” criterion rose up from the category (401600-) to the category (301400-).

The university maintained its global ranking in the “Reduced Inequalities” criterion in the category (601800-), as well as the “Peace, Justice and Strong Institutions” criterion in the category (301400-).

180 Animation and Multimedia Art Works from “MEU Architecture” Students Displayed at Faculty’s Art Exhibition

Amman – The one of a kind touches of Middle East University students were admired and applauded by the participants of the art exhibitions organized by the Faculty of Architecture and Design, under the patronage of the President of the University Prof. Salam Al-Mahadin.

The students' 180 works were distributed among the animation, multimedia, and freehand drawing course given by faculty member Dr. Qusai Mansour, and technical printing and color theory course given by faculty member Dr. Ayat Al-Fakra.

The artworks shed light on the essence of human life by exploring the different dimensions of personality, morality, and societal issues. This can be seen through the students' ideas which portray the complexities of human emotions, moral dilemmas, or social challenges through visual representations, therefore urging viewers to reflect and empathize with the diverse aspects of the human experience.

The students' work reflected the essence of cities and governorates, and their unique identities. They represented landmarks, architectural marvels, cultural diversity, and the vibrant energy of urban environments.

In this regard, the Dean of Architecture and Design, Dr. Ayman Awwad, said that the students' works provided visitors with an immersive and thought-provoking experience. He continued saying that the works encouraged dialogue and reflection on various societal issues and humanitarian situations, while allowing the attendees to interact with them and reflect on the messages they deliver.

In the presence of faculty members of the faculty and a group of students, Dr. Awwad added that the displayed works express the students' belonging, and national sense of responsibility towards Jordan and its issues.

Princess Basma bint Ali Sponsors Launch of National Center for Environmental Justice Initiative “My Environmental Contribution” at “MEU”

Amman – Princess Basma bint Ali sponsored the World Environment Day at the Middle East University and launched the “My Environmental Contribution” campaign, which aims to raise awareness, encourage responsible plastic consumption, and promote innovative solutions for reducing and eliminating waste.

The workshop was attended by the Chairman of the Board of Trustees of the University Dr. Yacoub Nasereddin, the University's Legal Advisor Prof. Anis Al-Mansour, the Director of the Royal Administration for Environmental Protection, Brigadier Fakhri Al-Qatarneh, the General Manager of the King Hussein Cancer Foundation Nisreen Qatamish, a number of relevant personalities, deans of faculties, and a group of students.

In this regard, Dr. Nasereddin said during a speech that the university's hosting of this event, which coincides with the celebration of World Environment Day, reflects our shared goal of spreading the culture of preserving the environment. He continued by saying that the environment today has become a top priority that has received a lot of attention internationally, as is the case for us in our dear country, Jordan, which was and still is at the forefront of those interested in environmental issues of all kinds and levels.

He stressed during the launch ceremony of the campaign that each person's participation, whether it be direct or indirect, leads us to an advanced stage of cultural and environmental awareness in preserving the environment in which we live in. He went on to say that preserving the environment is a noble goal that requires the great partnerships between government sectors, civil society organizations, universities, and institutes in a long-term sequential process, as this goal is not linked to consumer choices alone, but also to the production and consumption sectors.

In turn, the Director of the National Center for Environmental Justice Dr. Mohamed Ayadat explained during the launch ceremony that this campaign comes to contribute to laying the legal foundations for environmental protection and sustainability. He went on to say that the campaign provides the guidelines that will promote responsible practices across various sectors by addressing issues such as pollution, climate change, biodiversity, and resource management, mentioning that these guidelines will be launched in the next few days.

For her part, Qatamish said that it is necessary to work with our partners and environmental advocates to create a political environment that supports sustainability and views the transformation we are witnessing today as a national priority. This is especially important since the King Hussein Cancer Foundation launched the "With the Environment, Against Cancer" initiative to raise public awareness about the impact of climate change on health and cancer in particular, and to promote environmentally friendly behaviors that contribute to both sustainability and cancer prevention efforts.

In the same context, the representative of the Minister of Environment, Assistant Secretary-General for Technical Affairs at the Ministry, Abdul Majeed Khabour, said that it is necessary to cooperate with governments, non-profit organizations, and industry leaders to develop and implement effective regulations, incentives and strategies to reduce plastic production and encourage recycling and responsible practices for waste management, indicating that the ministry supports and encourages initiatives aimed at reducing the use of plastic in various sectors. This includes partnering with companies that are developing alternative packaging materials, supporting retailers who adopt plastic-free practices, and encouraging consumers to make informed choices by promoting reusable alternatives such as cloth bags, stainless steel bottles, and eco-friendly packaging.

In turn, Nisreen Haram, the Director of the legal company Qistas explained that environmental legislation serves as guidelines and systems to control pollution and protect public health. She continued saying that such legislations set limits on emissions from industrial productions, enhance waste management practices, ensure air, water and soil quality, improve living conditions, and promote environmental justice.

In a similar context, Mahmoud Nasser, Director of the Strategic Development and Administrative Affairs Department at the National Center for Environmental Justice, said that Jordan consumes 3 billion plastic bags annually, with an average annual consumption of 500 plastic bags per person. He added that "plastic waste" is estimated at 1923- million tons per year, including in lakes, rivers and seas, which is about 2,200 times the weight of the Eiffel Tower.

“MEU Pharmacy” Students Develop their Leadership Skills During University Workshop

Amman – The Faculty of Pharmacy at the Middle East University held a special workshop for its graduates, which aims to empower them, develop their leadership skills, enhance their professional competencies, and provide them with a comprehensive understanding of the evolving pharmacy scene, all while highlighting the emerging industry trends.

The workshop was presented by the Strategic Advisor of Queen's University Belfast, Director of the Pioneering Center for Therapeutic Care at the Hashemite University Dr. Muhannad Odeh.

The workshop focused on the current trends, regulations, and challenges of the pharmacy industry. It also encouraged students to adopt research methodologies, evidence-based practice, and critical evaluation skills, which ensures that pharmacists stay up to date on the latest developments in the fields of medical treatment and pharmaceutical sciences.

Students were trained in leadership simulation exercises that gave them the opportunity to experience leadership roles and make strategic decisions, enhance teamwork, effective communication, and problem-solving abilities.

“Sumo Robot Competition Held at “MEU

Amman – The robotic projects of students of the Faculty of Information Technology at the Middle East University were admired by visitors to the immersive science exhibition where a variety of sumo robots were presented.

The "Best Design" award was given to the team "TITANS", the members of which were students Ayham Emad, Ahmed Dughmash, Ahmed Hunaity, and Mujahid Badawy, while the first place prize in the robot fight competition went to the team "SMF", which included students Muhammad Eliwat, Saif Al-Hamid, and Firas Kherfan.

The university's Legal Advisor Prof. Anis Al-Mansour opened the exhibition in the presence of the Dean of Information Technology Prof. Ahmed Al-Hmouz, faculty members, and a group of students.

The exhibition included 18 projects, which were supervised by Dr. Laith Shehab, 10 of which are in the design and production lines stage, while 8 robots competed against each other in a sumo-

inspired arena. Two robots compete against each other in a ring with clearly drawn borders, and the robot that can successfully push its opponent out of the ring is deemed the winner.

The exhibition presented a comprehensive exploration of sumo robots, highlighting different aspects of the competition and the robots themselves. The visitors were exposed to the robots, and had the opportunity to interact with them closely, as well as examine their designs, components, and structures.

The participating students said that the exhibition is a place that represents the university's values, which aim to provide the appropriate atmosphere for dialogue, exchange of ideas, and nurturing minds. They added that the exhibition provided a comprehensive exploration of their work and designs, including the programming techniques used, and machine learning algorithms via remote controls or simulators.

Dean of Business Speaks to the Faculty's Top Students During Meeting

Amman – The Dean of Business at the Middle East University Prof. Hisham Abu Saimh met with the faculty's outstanding students, in the presence of the Dean of Student Affairs Dr. Ayman Al-Khazaaleh, and the Coordinator of Student Activities Dr. Ahmed Al-Harasis in a celebration of these students' exceptional achievements and contributions.

This meeting carries great significance, and its impact extends beyond honoring the students. The meeting serves as a platform that proves and recognizes the validity of their hard work and dedication in their fields of specialty.

This meeting is of great importance, and its influence extends beyond honoring the students, as it is considered a platform to honor their hard work and dedication in their fields of specialization.

In this regard, Dr. Abu Saima said that public recognition of their achievements not only enhances the confidence and self-esteem of the honored students, but also inspires other students to achieve excellence in their academic endeavors.

He added that the meeting brings outstanding students together in a unique space that showcases their exceptional skills and experience, and enables them to exchange ideas and experiences. It also enables them to form valuable relationships that may lead to collaborative projects, research partnerships, or academic endeavors.

For his part, Dr. Al-Khazaaleh stressed that such meetings enhance the reputation of the faculty among its peers. He said that such meetings show the faculty's commitment to academic excellence, and recognize its role in nurturing and developing exceptional talents.

The meeting included an extensive dialogue on the faculty's strategy, plans, and the agreements it signs with various institutions.

Workshop on Integral Work at “MEU”

Amman – The Consulting and Training Center at the Middle East University organized a training workshop on the concept of integral work in dynamic and innovative work environments.

The workshop, presented by Nasri Khasawneh, was attended by directors of departments and centers, forming teams that benefited from the techniques of collective intelligence, organizational work, shared responsibility, and active listening.

Through practical exercises, the workshop focused on the concepts of mental health and safety within teams, and its importance in creating an environment that helps in taking risks, exchanging ideas, and engaging in constructive discussion.

The workshop gave participants the chance to engage in exercises that demonstrated the importance of evaluating alternatives and making informed decisions collectively. It also equipped them with the best strategies that will help them overcome challenges, increase their ability to drive productivity, and achieve impressive results as cohesive and high-performing teams.

“MEU” Students Study the Components of Artworks at Jalaad Cultural Center

Amman – Students of the Faculty of Architecture and Design at the Middle East University visited the Hindiyyeh Museum at the Jalaad Cultural Center, which houses ε, . . . original paintings from the Middle East and North Africa. The visit aimed to nurture the students’ creative minds, as well as expand their visual horizons.

The visit’s importance comes from the interactive experience it provides students with immersion in a rich artistic environment, with which they engage in the compositions of artistic styles, historical contexts, and techniques used.

The visit was supervised by faculty members Dr. Ayat Al-Faqra, lect. Muhammad Al-Shayeb, and Engineer Shahd Wahsha from the Department of Graphic Design.

The students said that this visit gave them the opportunity to closely examine the visual elements used in the various artworks by taking a close look at how they

They added that the center included works that enhanced their ability to effectively interpret visual narration. This enabled them to break out of the ordinary in the field of design, and discover new ideas that enrich their creative process and push the limits of their imagination.

The students were extremely happy with the visit, as it allowed them to explore artworks from different regions, traditions and perspectives, providing them with a more comprehensive understanding of the world’s artistic heritage.

“MEU” Shares its Experience During a Dialogue Session about Press Freedom and Media Literacy

Amman – The Middle East University participated in the "Press Freedom and Media Literacy" session held at the Talal Abu-Ghazaleh Forum in cooperation with the Arab Women Media Center.

The university was represented by faculty member at the Faculty of Media Dr. Kamel Khourshid, who said in the presence of a number of journalists, academics, and students, that freedom of the press and media literacy are two interrelated pillars that play a vital role in promoting an enlightened and democratic society. He went on to say that the two are deeply rooted in the principles of freedom and democracy, and contribute to the development of critical thinking, public accountability, and the protection of individual rights and freedoms.

He also spoke about the phenomenon of inappropriate content found in some posts on social media platforms, along with its intentions to dominate people's memory, which requires intensive use of media literacy in a rational and purposeful manner.

Dr. Khurshid explained that press freedom embodies in its essence journalists and media institutions right to report news and express opinions without unnecessary censorship or interference. He added that it ensures the free flow of information, and enables citizens to access different points of view.

He pointed out that media literacy provides individuals with the ability to distinguish between reliable and inaccurate sources, in addition to identifying bias, and participating in media literacy. He added saying that media literacy is connected to responsible press freedom in a way that supports a democratic society, enables individuals to think critically, actively participate in the media scene, hold authorities accountable, protect human rights, and cultivate a vibrant and flexible democracy for the benefit of all.

“MEU” Student Wins Gold Medal in Jordanian Universities Chess Championship

Amman – Artificial Intelligence student at the Middle East University Saif Al-Hamid won the gold medal in the Jordanian Universities Chess Championship organized by the Sport Federation of Jordanian Universities.

The student's participation comes from the university's belief in the importance of engaging its students in dynamic competitions that enhance skills such as strategic thinking, problem solving, analyzing complex situations, assessing risks, and formulating effective proactive strategies.

The university team consisted of the members: Saif Al-Hamid, Abdulrahman Al-Kayyaly, Malik Ayyad, Sulaiman Kojak, and Bassel Majed.

In this regard, the Dean of Student Affairs Dr. Ayman Al-Khazaleh said that the competition requires its participants to be able to block out any distractions by practicing continuous focus during the match. This means that students will benefit from the competition in various academic disciplines as well as real-life situations.

He added that participating in the chess championship nurtures many qualities such as flexibility and sportsmanship, as it includes - like other sports - competitive moments such as victory and defeat, which teach students the importance of perseverance, and the ability to recover from setbacks. This helps them face their challenges with a positive mentality, through which they can seek continuous improvement.

It should be noted that the University's Sports Activity Division supervised the team's participation in the competition, and that the coaching team consisted of coaches: Samah Al-Sawafy, Ahmed Al-Azza, and Hammad Abu Saleh.

“MEU” Medical Day at Giza Attracts Over 800 Patients

Amman – The medical day held by the Middle East University in cooperation with the Talbieh Camp Specialty Clinics Center / Jordan Medical Aid for Palestinians Society and Yan Trading Company, received more than 800 patients who benefited from the medical, therapeutic and advisory services it provided.

A number of doctors, pharmacists, and nurses from the Faculty of Pharmacy at the university and the center participated in the medical day. The specialists present at the medical day specialized in different areas of medicine such as general medicine, orthopedics, internal medicine, gynecology, alternative medicine, cardiology, ear, nose and throat, and alternative medicine, under the direct supervision of the Dean of the faculty Dr. Enas Al-Khader.

In this regard, the Head of the Community Service and Extracurricular Activities Committee at the faculty, Prof. Khalil Al-Taif explained in the presence of faculty members that the integration of these different disciplines ensures that the medical day provided by the university gives its visitors a wide range of health care options, stressing that it represents the university's vision in achieving comprehensive healthcare.

He pointed out that the medical day provided visitors with consultation with ear, nose and throat specialists, who provided them with examinations related to common ear and throat problems, and discussed the treatment for cases of sinusitis, allergies, or hearing problems. In addition, the medical day provided assessments and recommended treatment options related to bone and joint problems, preventive care for cases related to internal organs, heart, blood vessels, respiratory health, digestive disorders, reproductive health conditions, and guidance on contraception and family planning.

“Exam Holding Procedures” a Workshop at “MEU”

Amman – The Middle East University organized a workshop titled: "Exam Holding Procedures", which was moderated by the Dean of Arts and Educational Sciences, Chairman of the Examination Committee at the university level Prof. Ahmed Moussa, in the presence of the deans of faculties and all faculty members.

The workshop comes within the framework of the university's preparation for holding the final exams for the second semester of the academic year ٢٠٢٣/٢٠٢٢. The workshop reviewed practical experiences based on the reality of the field with the aim of improving and developing performance in this field.

Prof. Moussa said that it is necessary to activate the policy models governing the entire examination process. He stressed that this policy, along with its procedures and models are subject to continuous evaluation and development to fit the students' best interest, and ensure accurate evaluation with the highest levels of integrity and transparency, in line with the principles of governance applied by the university administration.

He discussed with the attendees the details of the examination policy in force at the university for both computerized and written exams, and thanked the examination committees, supporting administrative units, and faculty members for their efforts, and wished the university students the best of luck in their exams.

“MEU” Wins Second Place at Chess Tournament Organized by the Ministry of Youth

Amman – The Middle East University won second place in the chess tournament organized by the Ministry of Youth.

The tournament was organized in celebration of the wedding of Crown Prince Al Hussein bin Abdullah II, with the participation of 14 teams representing public and private Jordanian universities.

The university team came in second place, surpassing the Mutah University team, and coming close to the first place won by Yarmouk University.

In this regard, the Dean of Student Affairs expressed his happiness with the position achieved by the university team. He continued by saying that this comes as a result of the university's investment in the minds of its students by integrating them into local, regional and international sports competitions.

He pointed out that the effect that chess has transcends cultural, linguistic, and social barriers. He went on to say that the students' interaction with opponents, exchange of ideas, and engagement in games that require an analytical mindset promotes healthy competition, mutual respect, and lasting friendships.

Princess Sumaya bint Al Hassan Sponsors “Women and Leadership” Conference at “MEU”

Amman – Under the patronage of Her Royal Highness Princess Sumaya bint Al Hassan, President of the Royal Scientific Society, the Women and Leadership in Jordanian Higher Education Conference is being launched in partnership with the Middle East University and the University of Strathclyde, with the support of the British Council in Amman.

The opening of the conference, which will be held at the Middle East University next Sunday, the 18th of June 2023, will witness the participation of a number of academics, researchers, and specialists.

The conference comes in line with the strategy of empowering women to contribute to economic modernization. This reflects Jordan's commitment to equality, equity, respect for human rights, and active participation in the elimination of all forms of gender-based discrimination.

The conference session, which is moderated by the Director of the Organizational Development Unit at the University of Strathclyde Dr. Kathleen Savage, will be attended by the President of the Middle East University Prof. Salam Al-Mahadin, the Chairperson of the Board of Trustees of Yarmouk University, former President of the Hashemite University Prof. Ruwaida Al-Maaytah, the President of Princess Sumaya University for Technology Prof. Wijdan Abu Al-Haijaa, and the Learning and Teaching Improvement Consultant at the University of Strathclyde, Prof. Fiona Smart.

The conference session will be titled "Women and Leadership in Higher Education in Jordan: Success Stories and Challenges", and will contain a general discussion between faculty members from participating academies from public and private Jordanian universities.

Through the conference, the university aspires to create environments that value and nurture women's talents and aspirations. This comes from the fact that women's empowerment leads to the flourishing of their leadership roles, as well as their contribution to the advancement of knowledge, innovation, and social impact.

Mexican Delegation Visits “MEU” In the Presence of the Mexican Consul

Amman – An academic delegation from the University of Mexico, in the presence of the country's consul Maria Guadalupe Brambila, visited the Middle East University to consolidate the strong relationship between the two sides and take it to a more advanced level.

The Mexican delegation included the researcher at the Center for Linguistic and Literary Studies at the University of Mexico Dr. Alfonso Medina, lecturer at the International Center of the University of Mexico Dr. Lucy Pedroza, and researcher at the Center for Linguistic and Literary Studies at the University of Mexico Dr. Ana Covarrubias.

In this regard, Dr. Medina gave a lecture in the presence of the President of the University Prof. Dr. Salam Al-Mahadin, the Director of the International Programs Center Dr. Rania Al-Zamat, a number of faculty members in the English Language and Literature Department, and a group of students. The lecture was about the importance of translation in literature, and how its related to other fields of knowledge, and that it does not only contribute to the field itself, pointing out that it promotes language, culture, and communication.

Prof. Al-Mahadin met with the guest delegation, and said during the meeting that the university believes in deep partnerships that meet the concept of positive globalization, unique education, research seriousness, and make a positive impact on a global scale. She stressed that education should not be limited to the transfer of knowledge, but must also develop to a higher level that improves critical thinking, problem-solving skills, and adaptability.

Awarding “MEU” Students for Winning Competitions and Participating in Voluntary Work

Amman – The Middle East University awarded its students who won cultural and artistic competitions, and excelled in the fields of volunteer activities and work.

The students' participations show their noble goals and sincere desire to make a positive difference in society. The awarding ceremony comes as a part of the university message, which believes that academic achievements are not the only measure of success, and that humanitarian work that showcases high values has the same significance.

In this regard, the Dean of Student Affairs Dr. Ayman Al-Khazaleh explained while awarding the students that education transcends the walls of the classroom and extends to the community, providing an opportunity for students to apply their knowledge and skills for the common good.

In the presence of faculty members Dr. Jumana Al-Salem and Dr. Amal Abu Haq, he stressed that this awarding ceremony is an inspiration to others. He went on to say that when individuals witness what their peers do and accomplish, it ignites a spark within them to engage and make a difference, and motivates them to get out of their comfort zones. He also pointed out that awarding positive behaviors and accomplishments is a catalyst for personal growth and development, and demonstrates the efforts and dedication of these students, as well as enhances their confidence and self-esteem.

Cooperation Agreement in the Field of Meteorology Between "MEU" and Arab Weather

Amman - The Middle East University has signed a cooperation agreement with Arab Weather to develop and offer specialized training and diploma programs in meteorology, entrepreneurship, and artificial intelligence, in line with the requirements of the dynamic labor market.

The university was represented by its president, Prof. Salam Al-Mahadin, the Director of the Consulting and Training Center, Prof. Anis Al-Mansour, and on behalf of "Arab Weather", its CEO Muhammad Al-Shaker, and the General Manager of the company, Fares Shaaban.

Under the cooperation agreement, the above-mentioned programs will be implemented by skilled specialists. The agreement will also facilitate the flow of weather information and data between the two sides to support scientific research and technical development, especially in the field of developing weather forecasting technology, improving the performance of forecasting models, and weather information technology applications.

In this regard, the University President Prof. Al-Mahadeen said that this agreement serves as a bridge that will connect students to the technology used in meteorology and other fields. Such knowledge qualifies them to analyze weather data, make accurate forecasts, and deliver weather information to the public effectively, stressing the pivotal role of "Arab Weather" in this field.

In turn, Al-Shaker praised the way the university views bilateral partnerships, focusing on its continuous investment of the energies of its students, and directing them towards the right path to achieve sustainable growth and development.

“MEU” Contributes to Media During its Participation in the Expanded National Dialogue

Amman – The Middle East University contributed to the media scene during its participation in the "Expanded National Dialogue". The dialogue discussed the general policy of the media and government communication, through an open discussion that discussed promoting media freedom and ethics, improving government transparency, defining media ownership regulations, access to information laws, protecting whistleblowers, or using social media in government communication.

The university was represented by the Dean of Media Dr. Hanan Al-Sheikh, who said that the session, which was attended by official and academic media institutions, discussed the media messages of ministries and government institutions in a way that aligns with their strategies and plans, and unifies the government narrative.

During her intervention, she stressed the need to develop policies that aid in the development of media work, and provide workers in the field with a space to play their true role. Such roles include revealing facts, diving into what goes on behind the scenes, fighting misleading rumors, and improving public taste.

It should be noted that the draft general policy for media and government communication consisted of 8 themes: communication with the audience and the media, media legislation, media, social media, political modernization, economic and administrative modernization, media freedom reports, and development media.

First Meeting of the "Women and Leadership in Higher Education Network" Takes Place at "MEU"

Amman – The Women and Leadership in Higher Education Network held its first meeting at its permanent headquarters at the Middle East University. The meeting came to discuss the initial action plan for the coming period, and ways to activate and expand the network to include a larger number of Jordanian academics, in order to support women in leadership positions.

The announcement of the network came on the sidelines of the Women and Leadership in Jordanian Higher Education Conference, which was held under the patronage of Her Highness Princess Sumaya bint Al Hassan in the presence of the British Ambassador to Jordan Bridget Brind, the Director of the British Council, and a number of Jordanian dignitaries, representatives, and academics who represented public and private universities.

The establishment of the network comes after the Middle East University and Strathclyde University won a grant from the British Council, as part of the center's projects which aim to support partnerships between Jordanian and British universities in the fields of women's empowerment.

The first meeting of leadership in higher education, which was held at the university, was chaired by its president Prof. Salam Khaled Al-Mahadin, and representatives of the University of Strathclyde, which has a strategic

partnership with the Middle East University.

The meeting mentioned the importance of empowering women in the field of higher education, and breaking stereotypes that hinder their access to decision-making positions.

As for its recommendations, the meeting stressed the need to change the prevailing cultural perceptions that stop women from holding leadership positions. The meeting also emphasized the importance of providing a safe and inclusive space for women to share their successes, and overcome issues that stem from inequality.

The recommendations recognized the importance of improving women's self-perception, and stressed that they have the ability to increase women's representation in higher education leadership.

In this regard, the President of the University Prof. Salam Al-Mahadin, in the presence of representatives of the British University of Strathclyde, the British Council, and a group of faculty members of Jordanian universities, said that the Women's Empowerment Network that has been localized at the Middle East University recognizes the urgent need to hold training courses in leadership, and form a network of mentors to support academics and provide them with moral and logistic support.

"MEU" Awards Students who Presented Valuable Sustainability Solutions in International Competitions

Amman – The Middle East University celebrated the projects of students and winners of the IREX Global Sustainability Solutions Challenge. The celebration proves the university's sought to recognize students' contributions to coming up with solutions to serious environmental challenges such as climate change, pollution, and resource depletion.

The Innovation and Entrepreneurship Center's celebration of the students' achievements, and handing them certificates serves as a testimony of recognition and admiration for their informed decisions that are concerned with developing smart solutions based on modern technology and clean energy, in line with the United Nations Strategic Development Goals 2030.

In this regard, the Dean of Business Prof. Hisham Abu Saima said during the presentation of certificates that the Middle East University is fully aware of its role in nurturing future leaders who possess the knowledge, skills, and values necessary to lead the transition to a sustainable future. He also pointed out that its importance for these potential leaders to have the ability to inspire

others, influence policy-making processes, and drive change in their fields of specialization.

For his part, the Director of the Center, Dr. Fayez Al-Badri, acknowledged the pivotal role of innovation and leadership in stimulating qualitative transformation in the scope of the educational process and its objectives. He stressed that promoting a culture of innovation, and providing university students with the necessary skills and mentality is vital to drive sustainable development and support the economy.

He added that the university sees itself as a catalyst for change, inspiring students to think creatively and develop new solutions to pressing global challenges, especially in the field of environment and clean energy. This leads to the creation of small and medium-sized startups that contribute to the local economy, and have a major role in that dispelling sustainability related concerns.

The ceremony was attended by faculty member at the faculty of Business Dr. Abdul Razzaq Al-Aqoul, the leader of one of the teams participating in the challenges.

Jordanian Bar Association Awards “MEU” for Hosting Bar Exams

Amman – The Jordanian Bar Association awarded the Middle East University for hosting its written exams for many consecutive years.

This came during a meeting with the Chairman of the Board of Trustees of the Middle East University Dr. Yacoub Nasereddin, and the President of the Bar Association Mr. Yahya Abu Aboud, in the presence of the Dean of Law Prof. Ahmed Al-Lozi. The meeting discussed the most prominent aspects of the partnership between the two sides, especially with the university's implementation of the royal messages, which believes that the desired economic growth depends on the ability of the public and private sectors to consolidate real partnerships.

In this regard, Dr. Nasereddin said that the university views the Association as the main provider of legal knowledge and real-world experiences, which ensures that students are equipped with the necessary skills for successful legal practice.

For his part, the President of the Bar Association expressed his pride in the Middle East University, which has been hosting the Bar exams for many consecutive years. He talked about the importance of continuing this cooperation, at a time when

the association is honored by this sustainable relationship, stressing: "We will work to develop this relationship, and we trust our common vision."

During his presentation of the Association's shield to the senate, Dr. Nasereddin, he said that holding the written exam at the university adds high credibility to the Association's exams, as well as an additional layer of academic accuracy to the testing process.

In a related context, Dr. Al-Lawzi confirmed during receiving a shield for the faculty's supervision of the association's exams that holding the Bar exam guarantees that the individuals who will enter the legal profession will possess the knowledge and skills necessary to work as competent legal practitioners. He added saying that this aligns with the faculty's mission, which recently obtained the international (FIBAA) accreditation. The accreditation represents an official recognition of the faculty's achievement of the highest standards of European and international excellence and quality for the academic programs offered, and complements the university's successes and achievements in the field of international accreditations.

“MEU” Students Raise Awareness about Various Societal

Amman – Students of the Faculty of Media at the Middle East University have implemented the incredible journalism principles that they learned in their courses throughout the semester, through awareness campaigns that empower them to become agents of change, and promote a more informed, responsible, and participatory media system.

The awareness campaigns were prepared and implemented by the students of the Media Campaigns course taught by Dr. Ahmed Erekat. The campaigns came together to form in their entirety important messages that meet the university's vision in preparing leaders who present the noblest campaigns aimed at preserving the environment, stopping climate change, saving lives, as well as those related to social behaviors seen in the youth.

The campaigns are: "Keep it Clean" on issues of optimal waste disposal, "Park Safely" related to parking rules, "No Vaping" about the harms of vaping, "This is What You're" about the effects of energy drinks, and "A Second Life" about the culture of organ donation after death.

Launch of the Women and Leadership Network during a Conference Sponsored by Princess Sumaya bint Al Hassan at "MEU"

Amman – The "Women and Leadership in Jordanian Higher Education" conference kicked off at the Middle East University, under the patronage of Her Royal Highness Princess Sumaya bint Al Hassan, President of the Royal Scientific Society, and in the presence of the Chairman of the Board of Trustees of the Middle East University Dr. Yacoub Nasereddin, the British Ambassador Bridget Brind, and the President of the Middle East University Prof. Salam Al-Mahadin.

In a speech delivered on her behalf at the launch ceremony by the President of Princess Sumaya University for Technology, Dr. Wijdan Abu Al-Hajja, Her Highness said that Jordanian women have undeniable achievements that can't be overlooked, stressing the need to invest in equality in education.

She added that while many expected women to achieve the required level of dedication and seriousness, the labor market, despite its empowerment programs, continued to restrict their free and fair access to leadership positions.

In the speech, Her Highness pointed out that the obstacles that prevent women from succeeding require the solidarity of all in order to be overcome, and to draw a new society in which women are an active force.

She pointed out that empowering women requires intense action, not only in dismantling institutional barriers, but also in challenging and transforming societal attitudes. This reinforces the importance of advocating for change to forge a new path that diminishes gender-based biases.

For her part, the British Ambassador explained that gender equality and the fight against discrimination are seen as the policy that will make societies more cohesive, productive, and impactful.

She explained that when barriers are broken and gender-based discrimination is dismantled, societies will be able to provide fertile ground for progress, innovation and social

transformation. She also stressed that women's empowerment is not just an ideal goal, but also a practical approach that will enrich our societal structure.

For her part, the President of the University Prof. Salam Al-Mahadin, indicated that Her Highness Princess Sumaya bint Al-Hassan's journey is an eventful one that extends for more than 30 years at the level of Jordanian universities. Her Royal Highness has been supporting the development of human capital through her tireless efforts to make the university one of the important regional centers that represent an example model that everyone seeks to emulate it.

Prof. Al-Mahadin expressed her pride in Her Royal Highness Princess Sumaya's participation in highlighting the leadership roles that Jordanian women can play, and that this is what the conference seeks to achieve, before announcing the launch of the Women and Leadership in Higher Education Network.

During her speech, Dr. Kathleen Savage, Director of the Organizational Development Unit at the University of Strathclyde expressed her admiration for the Middle East University. She said that the university always meets the standards of development by creating its own opportunities, which is represented through today's conference, which came to help meet the unique needs of women in higher education in overcoming these challenges, and enhancing their professional growth.

The conference aligns with the strategic vision of economic modernization, proving the university's unwavering commitment to equality, justice, human rights, and the elimination of gender-based discrimination. Through the empowerment of women, Jordan seeks to foster an environment that enables progress.

The conference, which is a partnership between the Middle East University and Strathclyde University, and supported by the British Council in Amman, was attended by a number of academics, researchers and specialists.

Important Agreement Between the Jordan Insurance Federation and “MEU”

Amman – The Middle East University signed a cooperation agreement with the Jordan Insurance Federation. The agreement aims to improve the quality of academic programs in the faculty of business by including courses related to the insurance environment, accelerating the development and adoption of new insurance solutions that address emerging risks and challenges facing the business environment, and benefiting from the federation's expertise in the insurance sector.

On behalf of the university, the agreement was signed by its president Prof. Salam Al-Mahadin, in the presence of the Dean of Business Prof. Hisham Abu Saima, the Dean of Student Affairs Dr. Ayman Al-Khazaleh, and on behalf of the federation, the agreement was signed by its Director Dr. Muayad Al-Kloub.

This agreement promotes a comprehensive understanding of risks, therefore enabling the development of innovative risk management and insurance technology strategies, as well as the identification of new market opportunities.

The importance of this agreement extends beyond the insurance sector. By combining insurance expertise and academic research, this cooperation has the potential to create a knowledge system that can be used by other sectors. This can help bridge the gap between the learning outcomes of academic programs and the local, regional, and international labor market.

Prof. Al-Mahadin said that this agreement is a milestone which ensures that students receive a comprehensive and industry-aligned education, enabling them to become the next generation of insurance professionals who will make meaningful contributions to the growth and success of the insurance sector.

In turn, Dr. Al-Kloub, in the presence of the Director of the Quality Assurance Department Anas Al-Nsour, the Director of the Human Resources Department Karam Al-Nawaisa, and from the Department of Research and Training Mohammed Al-Amayreh, expressed his pride in the Middle East University, describing it as a prestigious name in the world of education, and that signing such an agreement carries with it many valuable goals.

In a related context, Prof. Abu Saima, in the presence of his deputy Dr. Muhammad Othman, the Head of the Business Department Prof. Abdulaziz Al-Sharabati, and the Head of the Department of Financial and Accounting Sciences Dr. Ahmed Marei, stressed that the university will work to achieve the maximum benefit from this partnership. Such partnerships are especially for the university to ensure that its students are ready to face the challenges and opportunities of the insurance industry, and put them on the right track towards successful and satisfying jobs that meet the requirements of the dynamic labor market.

Delegation of 34 Journalists from 15 Arab Countries Visits “MEU”

Amman – A delegation from the King Abdullah bin Abdulaziz International Center for Interreligious and Intercultural Dialogue (KAICIID) and RASED visited the Middle East University, the first stop of the 2023 Journalism Fellowship for Dialogue Program. The delegation included 34 journalists from 15 Arab countries.

The program focuses on training a group of journalists from diverse religious and cultural backgrounds from the Arab region on dialogue journalism. It also focused on enhancing their abilities to prepare highly professional reports focusing on issues of dialogue between followers of different religions and cultures, religious relations, and identities. The training provided aims to promote pluralism, diversity, peaceful coexistence, ethical standards for journalism, and combating hate speech.

In this regard, the President of the University Prof. Salam Al-Mahadin welcomed the visiting delegation from KAICIID, and the members of the Journalism Fellowship Dialogue Program, saying in the presence of the Dean of Media Dr. Hanan Al-Sheikh, and faculty members of the faculty that the university believes in the importance of journalism, its status, and its ability to achieve the desired change. She continued saying that the above mentioned points are the basis for the establishment of a faculty of media, which is the first and oldest faculty among all of the university's faculties, and the first of its kind with its advanced equipment included in its applied radio and television laboratories.

For his part, Mr. Waseem Haddad, Program Manager in the Arab region at KAICIID explained that dialogue journalism is a dynamic and participatory approach to journalism, which aims to engage in meaningful dialogue tracks that enhance constructive cooperation between journalists, and other active forces from international institutions and decision-makers in order to promote diversity, and build more cohesive and stable societies. In turn, the Founder and General Director of RASED, Dr. Amer Bani Amer, in the presence of the Executive Director Amro Al-Nawaiseh, explained that the primary objective of the Journalism Fellowship Dialogue Program is to nurture talent, foster innovation, and shape the future of journalism. This is done by investing in individuals who demonstrate exceptional potential and commitment to professional ethics, as this program typically offers a structured curriculum that provides access to resources that will help fellows enhance their journalistic skills, and deepen their understanding of the profession.

The visit included a tour of the Faculty of Media, during which the visitors discussed a range of pivotal Arab issues, in addition to an interactive experience in the faculty's radio and television studios. The visitors also learned about the teaching methodology adopted in the faculty, which extends to all faculties of the university, and uses the applied framework through dialogue lectures that put colleagues in front of courses with new forms of knowledge, and individuals with experience and skill in the field.

“MEU” Participates in Workshop about Digital Assets

Amman – The Middle East University participated in a workshop that laid the foundations of technological measures in today's digital landscape, in the presence of representatives of Al Hussein Technical University and Tamatem Games.

In this regard, the Director of the Information Technology Department, Raed Al-Lahham, explained during his speech to the Modern American School students that the university equips students, through cybersecurity and information technology, with the knowledge and skills to protect the digital infrastructure from evolving threats.

He added that with the increasing spread of technology, it has become necessary to protect important systems, networks and data from cyberattacks. This shapes the future of university education, indicated by the Faculty of Information Technology at the university in its strategy to develop the future of technological security.

Al-Lahham pointed out that cyber threats cause great risks to individuals and institutions alike. He added saying that it is necessary to understand risks and implement effective countermeasures to identify potential vulnerabilities, implement the best security practices, and respond quickly to them.

He stated that with the rapid advancement of technology, individuals must understand the implications of their actions, especially with digital ethics, privacy concerns, and legal aspects of cybersecurity. He also stressed the need to adopt responsible behaviors, such as respecting user privacy, using technology for positive purposes, and adhering to legal and ethical guidelines.

“Vocational Training” Employees Successfully Complete English Language Course at “MEU”

Amman – The President of the Middle East University Prof. Salam Al-Mahadin, awarded 17 participants in the IELTS preparatory English course, in cooperation with the Vocational Training Corporation.

In this regard, Prof. Al-Mahadin said in the presence of the University's Legal Advisor, Director of the Consulting and Training Center Prof. Anis Al-Mansour, the General Director of the Corporation Eng. Ahmed Al-Gharaibeh, and the Advisor to the Minister of Labor for Training and Human Resources Omar Qutaishat, that awarding and celebrating the participants in the English language course comes in recognition of their commitment to self-development, and their dedication to improving their language skills.

She added that the university is committed to implementing the royal messages related to partnership between the public and private sectors, and its importance in promoting sustainable development, driving economic growth, and meeting the diverse needs of society. She continued saying that the university thus exercises its role as a national institution that pursues effective cooperation that feeds the economy and dispels societal challenges.

In turn, Eng. Al-Gharaibeh expressed his happiness with the relationship between the Vocational Training Corporation and the university. He said that this sustainable partnership must be crowned by establishing comprehensive language programs that meet the evolving needs of the modern world. He went on to say that this awarding allows us to reflect on the immense importance of the English language in our rapidly evolving world, especially when it comes to different professional fields.

He explained that the English language has become a vital tool for communication, collaboration, and progress in many industries. He continued by saying that the English Language opens doors to a large number of opportunities, and enables individuals to thrive in diverse professional environments, whether it is in business, technology, academia, medicine, or arts, English language proficiency has become a prerequisite for success.

"MEU" Takes Part in the Development of Legislative Framework for Media Profession Ethics in the Age of Artificial Intelligence

Amman – The Faculty of Media at the Middle East University, has formulated a legislative and ethical framework for the profession of journalism and media in conjunction with the development of artificial intelligence technologies in the profession. This came as a part of the faculty's participation in the Media Education Academy in Jordan for the first time, which was hosted by the Jordan Media Institute, under the patronage of Her Royal Highness Princess Reem Ali.

The university joined universities and other institutions from brotherly and friendly countries such as: Egypt, Lebanon, Palestine, Iraq, Qatar, Oman, Syria, Morocco, Tunisia, and Germany, to come up with several important recommendations. The recommendations talked about the importance of identifying the basic concepts of artificial intelligence, including machine learning, deep learning, and critical thinking to evaluate and analyze the information provided by artificial intelligence systems and media sources. They also mentioned the importance of staying up to date with the latest developments and discussions in the field of artificial intelligence and media literacy, and using fact-checking tools and websites to verify the accuracy of information, as well as identify false information, rumors, or manipulated content. In this regard, Dr. Hala Amr, a faculty member at the faculty, stressed the need to expedite the holding of training workshops centered around literacy in the use of artificial intelligence applications so that they can be adapted in the way that best serves humanity. She also emphasized the importance of setting professional ethical standards for the use of artificial intelligence technology, which need to be followed in the newsrooms of Arab TV channels, newspapers, and agencies, similar to what was done at institutions such as Reuters and the BBC.

Dr. Amr also pointed out that it is necessary to think about creative projects that contribute to spreading the concepts of media and information literacy in different societies. She said that these concepts not only concern media professionals and workers in the field of journalism, but also every user of social media platforms.

Hanan Al-Sheikh Promoted to Associate Professor at “MEU”

Amman – The Council of Deans at the Middle East University has decided to promote Dr. Hanan Kamel Al-Sheikh, Dean of Media, to the rank of Associate Professor at the Faculty of Media.

Dr. Al- Sheikh holds a Bachelor's degree in Media and Communication from the University of Algiers, and holds a Master's and PhD in Media and Communication from the Middle East University and Ain Shams University respectively.

Dr. Al-Shaikh has extensive experience in television, radio and journalistic work, where she started her work at Al-Dustour newspaper as a journalist in 1993, then moved to work in the field of dubbing and documentary films until 2006. After that, she chose to work as a television reporter at Kuwait TV, Al-Jazeera Children's Channel, and Al-Rafidain respectively until 2011.

Dr. Al-Sheikh has participated in many local, Arab, and international conferences, in addition to supervising many master's theses, and has a valuable collection of research and studies published in refereed scientific journals.

"Physiotherapy" Students Practice the Teachings of their Applied University Courses in the Field of Biomarking

Amman – Students of the Faculty of Allied Medical Sciences at the Middle East University practiced the teachings of their applied university courses during the course: "Measuring Vital Signs and Diabetes Levels", so that they are ready for medical practice after graduation.

The university continues to define the concepts of applied education that translate its vision in providing students with experience in clinical practices that enhance their competence and scientific acumen.

During the course, physiotherapy students were introduced to different techniques for measuring vital signs, including blood pressure, temperature, blood oxygen levels, respiratory rate, and blood sugar levels. This course not only deepened their understanding of these techniques, but also instilled confidence in their ability to handle medical equipment effectively.

Through this course, the faculty aimed to prepare students for real-world scenarios by training them in the use of various medical devices, where they were trained on troubleshooting techniques, which ensures proficiency when working with many basic tools.

The practical side of the course extended beyond the confines of the classroom, where the student supervisor, a faculty member at the faculty, Dr. Mohammed Al-Hamrawi, will arrange field visits to various health care settings, such as nursing homes, to provide students with advanced levels of experience.

"MEU" Embraces "STEAM Village" Student Projects in the Field of Artificial Intelligence

Amman – The Middle East University recognizes the importance of embracing and developing the talents of the local community. This stems from the university's social responsibility and mission to prepare leaders who are capable of contributing to the development and advancement of society.

In this regard, the university hosted the exhibition titled: "Supporting and Embracing Creativity". The exhibition included a number of projects by STEAM Village students between the ages of 6 and 16, during which they presented their work in the field of artificial intelligence.

The exhibition was attended by the President of the University Prof. Salam Al-Mahadeen, deans of faculties, and faculty members.

The students' projects in the exhibition impressed many due to the advanced level of their ideas. A few of these projects were the project about predicting kidney disease, as well as the (Virtual opencv) project aimed to help patients with epilepsy and electrical charges by students Duaa Abu Jreeban and Nour Al-tawalbeh. Among the impressive projects was a project about predicting electrical energy consumption by students Muawiya Al-Manaasa and Jeevara Al-Falouji, the EV3 sumo competition project by students Youssef Al-Rawahneh, Ghaid Al-Aqtash, Karam

Mansour, and Leen Mansour, the project (Smart City Project) by students Khaled Al-Maaya, Youssef Abu Shehadeh, and Muhammad Al-Aqtash, and the (Smart Refrigerator) project by student Abdullah Halayba. In addition to the ones mentioned above, other significant projects included the project "DrawingPainting in relation to artificial intelligence" by students Mayar Al-Faloujy and Maria Al-Shawabkeh, the project "Making Use of Sport Fields Energy" by students Zain Al-Nahas, Aya Saad, Abdullah Al-Wakhyan, and Majed Al-Hababsa. The projects "The Visually Impaired Arab Football Audience: Technological Solutions" by students Leah Al-Yaqoub, Karen Hijazeen, and Julie Hijazeen, "Trees in Our Life" by students Omar Faouri and Ghaith Abu Al-Ghanam, and "Mathematics and Artificial Intelligence" by students Saja Al-Shakhanbeh, Prince Abu Qaoud, Asma Al-Aqtash, Ban Al-Aqtash, and Ghaith Abu Al-Ghanam were also very well received.

In this regard, the Director of the Training and Consulting Center Prof. Anis Al-Mansour, announced the establishment of a summer club on the university campus to develop thinking skills (artificial intelligence and cybersecurity). The camp comes as a result of the great need for individuals with advanced thinking skills in the constantly developing fields of artificial intelligence and cybersecurity. Prof. Al- Mansour

expressed that the camp aims to meet these market demands and empower students, and expressed the center's pride to embrace the Artificial Intelligence and Cybersecurity Club as a platform through which students will embark on a transformative journey, where they acquire priceless knowledge and skills, which will prepare them for success in dynamic fields.

He also stressed that the students' ideas represent advanced skill levels, which the university will work on enriching and developing through the summer club, therefor providing a space to transform ideas into reality.

For her part, the Director of STEAM Village, Eng. Banan Al-Banna, praised the Middle East University's efforts of embracing and supporting the center's students, and providing them with the opportunity to display their work through the exhibition.

She stressed that these works and achievements are the harvest of the hard work and integrated effort from the creative students and trainers of the center. She continued by saying that these works are living proof that represents the importance of artificial intelligence and its great role in showcasing our children's capabilities, as well as its major role in creating a conscious, educated and thinking generation that is capable of playing an effective role in our society.
