## Employers Describe MEU's Allied Medical Sciences Students as "competent and dedicated physical therapists" During Faculty Meeting

Amman – A dialogue meeting of the Faculty of Allied Medical Sciences at the Middle East University with employers and specialists stressed the importance of preparing graduates for the work field. The meeting discussed the field's need for physical therapists who are knowledgeable and committed to the highest level of the profession's ethics, in order to provide the best possible care for patients.

The meeting was attended by the Dean of the Faculty, Dr. Anas Al-Ashram, the Head of the Physical Therapy Department, Dr. Tariq Ibrahim, and a faculty member, Mr. Qusai Al-Janada. The guest delegation of specialists included Mr. Islam Qaddah from PhysioOne Advanced Therapy Center, Mrs. Enas Al-Tarifi from Dorrat Al-Aqsa Physical Therapy Center, Mr. Muhammad Abu Al-Rus from Tla'a Al-Ali Physiotherapy Center, and Mr. Muhammad Al-Dajah from WM Physiotherapy Clinic.

The meeting discussed the extent to which the curricula are adapted to the needs of the profession, as well as the desirable qualities that owners of facilities and treatment centers are looking for in the graduate. These not only include clinical skills, but also extend to empathy, communication, teamwork, and adaptability skills.

The meeting focused on treatment planning practices, which rely heavily on patients, their ages, their condition and developments, and their community environment and characteristics. It also emphasized the need to improve communication skills, as they are essential in the field of health care, especially with the exceptional abilities that physical therapists require in order to convey complex medical information to patients and their families.

In this regard, the Dean of the Allied Medical Sciences, Dr. Al-Ashram, said that graduates of programs that actively deal with industry stakeholders are more attractive to employers because they have the knowledge and skills that directly correspond to the needs of the labor market. He added that this can lead to high employment rates, as well as an abundance of successful career transitions for students.

He pointed out that such periodic and regular dialogue meetings can be part of the process of evaluating and improving the educational program, where feedback from employers and specialists can help the faculty identify areas in its curricula and teaching methods that need improvement.

## MEU Students Win Gold and Bronze Medals During Muay Thai Championship

Amman – Student of the Faculty of Business at the Middle East University, Moataz Billah Sarar, won the gold medal for the 81kg weight class of the Kingdom Muay Thai Championship, while student Saif Al-Din Al-Shammout of the Faculty of Pharmacy won the bronze medal for the 71kg weight class.

The university offers scholarships to outstanding athletes, and recognizes the importance of sports in building a serious and committed personality, and disciplined teamwork. This can be seen through the sports facilities that the university provides such as stadiums, tracks, and gyms equipped with the latest training equipment designed for performance analysis, with coaches who play a pivotal role in nurturing talents, and ensuring that students reach their full potential.

In this regard, student Sarar said that participating in the Muay Thai Championship requires a high level of physical and mental strength, which the university, through its advanced training facilities and keeping pace with international standards, has provided to its students. He continued by saying that the sports activity trainers at the Deanship of Student Affairs subjected them to strict and intensive training that not only qualified them to compete in the championship, but also contributed to enhancing their physical strength, self-control, flexibility, and mental discipline required for concentration.

For his part, Al-Shammout indicated that the exercises provided a psychological stimulus that helped them maintain a healthy pattern, which ensured that they stay at peak of physical condition. He added that it also developed their personalities by making them disciplined and responsible, as the discipline required to excel in Muay Thai extends beyond the fighting ring, and can have a positive impact on the personal and professional lives of fighters, especially as it teaches them valuable life skills such as perseverance, humility, and overcoming difficulties.

Muay Thai is a sport that dates back to many centuries, and was originally developed for the purpose of self-defense, in addition to being a form of combat training for soldiers. This demonstrates the sports' importance in promoting fitness and fostering a sense of community.

## MEU's Civil Engineering Program Obtains Globally Recognized ABET Accreditation

Amman – The Civil Engineering Program at the Faculty of Engineering at the Middle East University has received the American ABET accreditation. By obtaining the ABET accreditation, the program joins the Computer Science program at the Faculty of Information Technology and the Renewable Energy Engineering program at the Faculty of Engineering, which have recently obtained the accreditation.

Thanks to accreditation, students will be able to complete their studies in the USA and around the world, due to the dual value of their degrees compared to programs without such accreditation, which ensures education that transcends borders and provides unparalleled value.

The accreditation process includes a comprehensive assessment of curriculum, faculty qualifications, resources, and student outcomes. The accreditation ensures the program's academic strength, contemporaneity with labor market standards, industry expectations, and gives students a place to learn under the hands of experts with academic acumen and practical experience.

The accreditation qualifies students of the program to practice their profession in countries around the world, as its recognition is not limited to the USA, and employers consider it a mark of excellence that provides graduates with a vacant seat in the labor market no matter how crowded it may be.

The university sees the accreditation as more than just a milestone, but a commitment that equips students with an education that meets the highest globally recognized standards, making them leaders who excel in their fields and contribute to the advancement of their communities.

## Students of MEU's Medical Faculties Receive Training in Health Informatics Following Cooperation Agreement with "Hakeem"

Amman – The Middle East University signed a cooperation agreement with Electronic Health Solutions (EHS) “Hakeem” program to train students of medical faculties on health informatics, as it is considered the crossing point between healthcare and information technology, and a critical element in the providing modern health care.

On behalf of the university, the agreement was signed by its president, Prof. Salam Al-Mahadin, and on behalf of EHS, its CEO, Eng. Omar Ayesh. The agreement was signed in the presence of the Dean of the of Nursing, Dr. Anas Al-Ashram, as well as faculty members.

The significance of the agreement comes from the transformations taking place in the field of healthcare. This is driven by the integration of information technology and data science into the field, which means that students are in a world where healthcare and information technology are becoming increasingly intertwined.

In this regard, the University President, Prof. Al-Mahadin, said that the university is fully aware of the magnitude of the challenges facing graduates of various medical programs. She continued by saying that this agreement comes to provide students with the necessary tools that will help them benefit from data and technology in patient care. This is especially important as electronic health records, diagnostic imaging programs, and clinical decision support systems will enable them to make more accurate and timely diagnoses in the future.

She added that such tools will teach students how to derive meaningful insights from patient records, research data, and genomic information, which are all pivotal skills when it comes to advancing evidence-based medicine, facilitating clinical research, and spurring medical innovation.

For his part, the CEO of EHS, Ayesh, in the presence of the Director of the of Education and Knowledge Department, Afnan Jibril, and the Hakim Academy Official, Eng. Hamza Al-Jaafra, said that it is very important to link all health sectors in the Kingdom with each other within an electronic network through which some of the needs of the public health sector can be identified. He stressed that the integration of health informatics in the education of students of medical faculties is not just a response to current trends, but rather a necessity to prepare the future generation of health care workers, and that the signing of this agreement comes to develop health informatics skills.

## MEU Visits its Alumni in their Workplaces

Amman – Middle East University alumni shared their success stories in their workplaces to the Alumni Follow-up Office delegation. The alumni said that the university has successfully prepared them to be leaders through the knowledge, skills, and educational programs it offered them, which have developed their scientific knowledge.

Such visits, which are carried out by the office as one of its tasks to track the career progress of alumni, provide guidance on job opportunities, and facilitate their career development. This enables the office to identify trends and patterns of alumni' career paths, which helps students in making informed career decisions.

MEU alumni share a unique bond with their university, one that goes beyond graduation day and extends to their entire career journey. This is something that was unanimously agreed upon by the 13 alumni visited by the office, saying: "This visit and other initiatives demonstrate the university's proactive approach, which has demonstrated its unwavering commitment to being with its alumni in their work fields.

They also explained that such visits are a testament to the university's keenness on maintaining a proactive and influential presence in the lives of its alumni.

## MEU Garner Attention During its Participation in Rising Arab Changemakers Award

Amman – The Middle East University surpassed more than 150 participants in the Rising Arab Changemakers Award held in Lebanon.

The university's success was carried out by Renewable Energy Engineering Graduate Eng. Mallak Al-Rai. Al-Rai was honored with one of two awards, after going through the evaluation process in its two stages, in addition to receiving a general public vote of 20%.

The award presented to the graduate comes as a culmination of her achievements and innovative voluntary initiatives aimed at achieving sustainable development goals. This is made possible through a series of various training and educational activities distributed along the university program's study plan.

Such participations enable students to interact with global industry leaders, researchers, and entrepreneurs, which can enhance their career prospects and contributes to knowledge exchange.

This achievement also reflects the Faculty of Engineering 's commitment to supporting and encouraging creative youth, and building an innovative generation that contributes to achieving sustainable development.

## MEU Students to Embark on Study Experiences in New Buildings Which Align with Global Higher Education Developments

Amman – The Middle East University signed a contracting agreement with Ahmad Badaweih Contracting Establishment to equip the finishing and electromechanical works in the new scientific faculties building "N".

The building will serve as a complex for applied and technical education, and will be equipped with the latest laboratories that showcase the local and global labor market requirement.

On behalf of the university, the agreement was signed by the Vice Chairman of the Board of Directors, Dr. Ahmad Yacoub Nasereddin, and on behalf of the establishment, its CEO, Mr. Hossam Ahmad Badaweih.

The construction of the new MEU buildings is proceeding as planned, in line with the university's strategic plan, which aims to introduce new standards to the educational experience that use advanced technologies and systems to enhance its functionality, efficiency, sustainability and user experience. This allows students to access resources using internet technology, networking, charging stations, digital signage, and smart lockers to facilitate the use of personal devices and enhance comfort.

## MEU Renewable Energy Engineering Graduate Receives 2023 Women in Energy Award

Amman – Engineer Mallak Al-Rai, a graduate of the Faculty of Engineering at the Middle East University, won the “Rising Star in Educational Counseling” award at the Middle East and North Africa level, during the Women in Energy Summit held in Beirut.

This award recognized Eng. Al Rai's distinguished achievements and outstanding role in making positive change in the environmental and renewable energy fields.

The summit included several panel discussions that discussed the role of women in promoting environmental sustainability, as well as adopting clean technology in the energy sector.

The event was attended by inspiring women who have achieved tangible success in the environmental and energy fields, and contributed to achieving the desired positive change.

In this regard, the Head of the Renewable Energy Department at the university, Dr. Samer As'ad, emphasized the role of the Faculty of Engineering in building distinguished and leadership oriented female characters that are responsible for all aspects of societal development.

He added that this award represents the university's vision in investing in the skills of both its students and faculty members through providing them with a constructive space that fuels minds and creates opportunities.

## Senate Dr. Nasereddin Emphasizes Importance of Women's Role in Building Society Through Workshop in Cooperation with Public Security Directorate

Amman - The Chairman of the Board of Trustees of the Middle East University Senate, Dr. Yacoub Naserddin, sponsored a workshop centered around the role of women in achieving societal peace and security. Present at the workshop were the Assistant Director of Preventive Security, Colonel Muhammad Obaidat, the Vice Chairman of the Board of Directors, Dr. Ahmad Nasereddin, the University President, Prof. Salam Al-Mahadin, a number of women in security ranks, as well as representatives of ministries.

The workshop was held over the course of 3 days, and was divided into 11 sessions, the most prominent of which were: Behavioral Predictions of an Extremist Personality, Female Recruitment, Electronic Games, Societal Peace from a Religious Perspective, and The Impact of Hate Speech and Rumors on Societal Peace.

The workshop considered the need for recognition of women's role in achieving societal peace and security, and called on participants to contribute to a brighter and safer future by utilizing the power of women's leadership and participation, and employing them as agents of positive change to move closer to a world free of gender-based violence.

In this regard, Colonel Obaidat said that there are many challenges that must be overcome in order to achieve a safe and unshakable society that rejects discrimination, abhors terrorism, and aspires to prosperity and vitality. He added that building trust and interacting with local communities is extremely important to achieve the desired goals.

He stated that the university is a serious partner and is committed to achieving a state of positive interaction with the Public Security Directorate. He continued, saying that this is not new of the university, as it is more than just an educational institution, and that it fulfils its duties to the fullest extent, and directs its students and members to be effective leaders in the advancement of society.

For his part, Dr. Nasereddin stressed that the vision of His Majesty King Abdullah II bin Al-Hussein serves as a compass towards empowering women, and paves the way for us in order to create a generation that is aware and capable of going through many experiences in a number of important paths to build a bright and sustainable state, which is something that the public and private sectors, as well as the local communities must participate in achieving.

He said that Jordan realized - in a timely manner - the importance of focusing on women. He explained, saying that women are half of society, and their vital role in forming families and directing the energies of children, along with the changes that have occurred in the structure of social relations as a result of the communications and information technology revolution, was the reason for Jordan's insistence on choosing the Women and Youth Committees in the Royal Committee to Modernise the Political System. This is especially important since Jordanian women are an active element capable of participating in political, economic and administrative modernization processes, and in crossing into the second centenary of Jordan's glorious history with determination and ability.

## MEU Students Interact with Arab Authors and Writers During Amman International Book Fair

Amman – The Middle East University accepted the invitation of the Union of Jordanian Publishers to attend the Amman International Book Fair, which was held in cooperation with the Ministry of Culture and the Greater Amman Municipality.

The exploratory visit to the fair was attended by students of the Cultural Club of the Deanship of Student Affairs at the university, and shows the university's focus on reading as a fundamental pillar for personal growth, societal progress, knowledge acquisition, and opening doors of wisdom, exploration, enlightenment, and enrichment.

In this regard, the Dean of Student Affairs said that this visit introduced students to thousands of books that can be called repositories of human wisdom, which document human discoveries and experiences. He adding that the aim of this visit is to raise the level of critical thinking among students, as when they deal with texts, they will face a challenges related to evaluating information, analyzing it, and compiling it, which sharpens their cognitive abilities, and encourages them to question, compare, and form logical opinions.

He stressed that such visits allow students to interact with writers and critics, which adds additional impact to this visit that goes beyond usual visit to such fairs. This enriches the literary aspects of the students' personalities, feeds their intellectual curiosity, and forms their positive attitudes.

For their part, the students expressed their happiness with such visits, as literature in particular provides a window into the minds of diverse personalities and cultures. They added, saying: "By immersing ourselves in the stories and perspectives of others, we develop our emotional abilities, which provide us with a deeper understanding of the human condition."

They explained that the characters in the books often battle feelings, relationships, and complex moral dilemmas, and that by empathizing with these characters, they develop their social and emotional intelligence, which makes them better equipped to deal with their emotions and interpersonal interactions.

## “Women are the builders of society” ... Concluding Workshop in Cooperation with Public Security Directorate

Amman – The Middle East University concluded a workshop on "The Role of Women in Achieving Community Peace and Security", in cooperation with the Community Peace Center of the Preventive Security Department at the Public Security Directorate. The workshop had several outcomes, the most important of which was that women are an essential element in the process of renewal and development, and that the power of women's leadership and participation must be utilized, as they are factors that contribute positive changes, and help us get closer to a world free of gender-based violence.

The three-day workshop was sponsored by the Chairman of the Board of Trustees of the Middle East University, Dr. Yacoub Nasereddin, in the presence of the Assistant to the Director of Preventive Security, Colonel Muhammad Obeidat, the Vice Chairman of the Board of Directors, Dr. Ahmad Nasereddin, and the University President, Prof. Salam Al-Mahadin.

In this regard, Colonel Obeidat said that the malicious crimes of extremism and terrorism are not isolated incidents; they are global threats with repercussions far beyond their immediate victims.

He added, saying that our youth, who should be implementers of peace and future progress, are particularly vulnerable to such influences. He continued, saying that and we, as a global community, must protect them, equip them with knowledge, and confront the divisive narratives that threaten our world.

In turn, Dr. Nasereddin said that the Jordanian woman's role as a mother and a member of society has an indispensable role in shaping current and future generations. He added that their influence goes beyond their home, and extends to our communities, our nation, and even the world.

By recognizing and celebrating the contributions of Jordanian women, we honor their resilience, dedication, and ability to be catalysts for positive change.

Certificates of appreciation were handed over to the participants from female security ranks and representatives of the ministries at the end of the workshop.

## An Enriching Experience for Middle East University Students in a Nursing Home to Develop their Sense of Responsibility and Appreciation

Amman – Students of the Volunteer Club at the Middle East University took part in activities that formed strong bonds between themselves and the elderly visitors of the Golden Age Home. The visit represented an enriching experience that witnessed a unique mix of different generations.

This visit was of great importance to the students of the volunteer club, as it developed their sense of responsibility. The students engaged in multiple activities with the elderly, and found themselves talking about and interacting with many stories, which was an effective form of treatment for the elderly. Such conversations and interactions are considered a form of mental stimulus that prevents cognitive decline, and of conditions such as Alzheimer's disease, which helps maintain the elderly's cognitive function.

With the abundant knowledge, life experiences, and inherent perspectives of the elderly, the visit served as a platform to pass on their knowledge and personal stories. This not only preserves the students' sense of the value towards life, but also provides them with the opportunity to learn from previous lessons that the elderly have gone through throughout their life, which makes students more inclusive individuals, and provides them with a deeper understanding of the human condition.

The visit, which was supervised by Psychological Counselor Aseel Zreikat and the employee of the Activities Department Abdullah Al-Ghalban, included singing segments and religious competitions, presented by student Moaz Abu Mahfouz.

## MEU Shares Research Paper about Institution's Role in Providing Psychological Care

Amman – The Middle East University shared its research paper on the role of the institution in achieving psychological care during the activities of the Scientific Day at the Jordanian Psychological Association, held at the Royal Cultural Center, under the patronage of Speaker of the House of Representatives Ahmed Safadi.

The research paper presented by the Assistant to the University President, Dr. Salim Sharif, recommended the establishment of a higher council for mental health, consisting of representatives of all segments of society. This shows the university's efforts in building a cohesive community system that has an advanced level of stability when it comes to mental health, as it is the cornerstone of every prosperous society.

The research paper stressed the importance of community participation in shaping mental health policies, especially as it is considered an essential aspect of human existence, and affects the lives of individuals and communities alike.

The paper demonstrated that the establishment of a supreme council for mental health, composed of community representatives, will help shed light on the prevalence of mental health disorders and their societal impact. It will also allow for discussions about the shortcomings of current mental health systems, ensuring the reshaping of the mental health landscape and building the overall well-being of the community system.

## Students in International Programs at Middle East University Meet their Lecturers from The United Kingdom

Amman – In the expanding global landscape of higher education, institutions often find innovative ways to transcend geographical boundaries and create unique educational opportunities. A vital example of this approach is the partnership between the University of Bedfordshire and the Middle East University, as British faculty members arrived at the Amman campus to start giving lectures to undergraduate students in international business and cybersecurity.

This partnership represents a remarkable convergence of academic expertise and international partnerships, heralding a new era of transcontinental education.

In this regard, the Director of the Center of International Programs, Mai Abu Hamdia, said that this cooperation confirms the strength of international partnerships in the field of higher education, and that the Middle East University is serious about facilitating the exchange of knowledge, experiences, and teaching methodologies.

She pointed out that students will immerse themselves in a truly global educational experience, especially as they will be close to competent lecturers, whose first task is to guide students to be change-makers and entrepreneurial innovators.

It is worth noting that the Middle East University's partnerships extends to the University of Strathclyde, UK, especially with the MSc of Applied Translation program, which qualifies students to obtain a master's degree from the University of Strathclyde in one year without leaving Jordan.

## With Participation of the United Nations, MEU Provides Realistic Simulation of Human Rights Dialogue Sessions

### With Participation of the United Nations, MEU Provides Realistic Simulation of Human Rights Dialogue Sessions

Amman – The Middle East University has provided 150 students from schools in Amman with a realistic simulation of panel discussions organized by Brain Share, supervised by Senior UN Human Rights Advisor Christina Meinecke.

The dialogue sessions were opened by the Assistant to the University President, Dr. Salim Sharif, in the presence of the Director of the Center of International Programs, Mai Abu Hamdia, and relevant figures.

The dialogue sessions focused on the Global Compact, legal frameworks, and ethical human rights endeavors. This is especially important since the Universal Declaration of Human Rights is a testimony which states that rights are universal and inalienable, and affirms the free and equal birth of every person regardless of race, nationality, religion, or gender.

The dialogue sessions emphasized that human rights have an effective role to play in promoting social progress around the world. They also contribute to the elimination of slavery and discrimination, the promotion

of diplomatic solutions, conflict prevention, and the protection of vulnerable populations in times of crisis.

The dialogue sessions concluded that human rights are closely linked to the United Nations Sustainable Development Goals, and with the Universal Declaration of Human Rights focusing on social and economic rights, they emphasize the need for inclusive development that leaves no one behind.

In this regard, the students agreed on the importance of such dialogue sessions in making them fully aware of human rights and everything that surrounds their legal frameworks, and is related to their noble humanitarian goals. They added that these sessions also provided them with the opportunity to be advocates for human rights in order to defend their principles and values. This provides students with the basis for engaging in everything that supports marginalized communities and challenges injustice.

They emphasized that by re-imagining a new generation, inextricably linked to human rights, they would be able to address the pressing matters of our time.

## Middle East University Expresses its Stance: The Occupation Committed Moral Violations... We Unite for Gaza and Rally Around the Hashemite Leadership

Amman - A solidarity stance by the Middle East University condemned the intense Israeli bombing of the Gaza Strip, which resulted in the martyring of over 3,000 Palestinians to date, the majority of whom were children and women. The unified message of the stance is that conscience is the alarm which tells us that we are alive, and that fear, accompanied by prayer, comes from good morals that strike the chords of indifference and push us to chant loudly: "Your pain, O Gaza, is my pain... We are united today and every day"

The solidarity stance was sponsored by the Chairman of the Board of Trustees of the Middle East University, Senate Dr. Yacoub Nasereddin, and was attended by the University President, Prof. Salam Al-Mahadin, the Mayor of Giza, Qadr Al-Fayez, faculty and administrative staff members, as well as a group of students.

In this regard, Dr. Nasereddin said that what is happening in Gaza is a blatant violation of human rights, international law, and humanitarian conventions. He continued, saying that the Israeli occupation army is the source of these violations, which denounces the Palestinians' resistance to its offences on their own land. He stressed that what is happening now is very similar to what happened during The Battle of Dignity, just in another way.

He stressed the necessity of staying in line with the Jordanian constants, which call for the establishment of a Palestinian state on the land of 1967, with Jerusalem as its capital, and a Hashemite guardianship over the Islamic and Christian holy

sites therein. Dr. Nasereddin pointed out that the rally around His Majesty the King, the army, and the security services is due to the unique state of harmony between the leadership and Jordanian public, which calls for the importance of listening to the voice of truth and wisdom coming from the Hashemite leadership, while staying away from misleading news sources.

Dr. Nasereddin explained that the Hashemite leadership has succeeded in attracting the attention of the world through its wise leadership, and that His Majesty the King has told the entire world that we must avoid anything that calls for more violence against Palestinians, which will prevent the region from being dragged into a large-scale war. Dr. Nasereddin also called on everyone to refrain from creating rumors that aim to lower, disrupt, or limit determination, at a time when the children of Gaza are being murdered while in their mothers' wombs, and are being displaced and starved, which are all war crimes that require holding those behind them accountable.

For his part, the Dean of Student Affairs, Dr. Ayman Al-Khazaleh, said that today's solidarity stance answers the call of our religion and morals, saying that no other cause has united speeches, raised feelings, gained attention, and brought Jordanians and Arabs together as much as the Palestinian cause. He added that words are not just interconnected letters that don't change anything, and that they are able to express solidarity, show emotion, and demonstrate strength and certainty, as occupied Gaza needs our support.

## MEU Maintains its Lead in QS Arab Region University Rankings

Amman – The Middle East University has maintained its lead in the QS Arab University Rankings in 2024, ranking in the 101110- category.

The results were announced in the State of Bahrain, with over 600 Arab universities competing for their spot on the ranking list.

The classification is based on 6 criteria: Employer reputation, faculty/student ratio, international research network, citations per paper, and papers per faculty.

This achievement is a testament to the collective efforts and unwavering commitment of the entire university community to providing world-class education, promoting cutting-edge research, and making a positive impact on society.

In this regard, the University President, Prof. Salam Al-Mahadin, said that this achievement reflects our commitment to promoting an inclusive educational environment that nurtures the talents and aspirations of its students. She added that achieving this advanced rank came after working hard to upgrade the quality of the university's program package, in a direct call to continue to focus on our mission of providing exceptional education, and continuing to promote innovation and positive change in our society.

In turn, the Director of the Accreditation, Quality and Information Center, Prof. Ahmed Al-Lozi, stated that this achievement reminds us that the journey should not stop here, and that it is necessary to continue pushing boundaries, striving for excellence, and making a lasting impact.

He added that the university has made remarkable progress in the criteria of employers' reputation, citation per paper, and web impact, in which the university achieved second place at the level of Arab universities.

## MEU and YAN Industrial Trading Company Contribute to Aiding Palestinian Brothers and Sisters in Gaza

Amman – The Middle East University and YAN Industrial Trading Company contributed 35,000 dinars to support our brothers and sisters in the Gaza Strip due to the intense Israeli aggression they are being subjected to. This embodies the commitment to social responsibility locally and regionally, and to highlight the noble initiative of making a positive impact on the world.

In this regard, the Chairman of the Board of Trustees of the Middle East University, Dr. Yacoub Nasereddin, said that the university is aware of the deep and long-term effects of what our Palestinian brothers and sisters are being subjected to, and the widespread suffering it leads to. For this reason, it is necessary for the university to stand by them and respond to the call of humanity, morality, and solidarity, to help them recover and alleviate their suffering.

He pointed out that the university followed the footsteps of the Hashemite leadership, which has always stood by our Palestinian brothers and sisters since the first day of the Israeli aggression. This comes at a time when the Hashemite leadership considered what is happening to the Palestinians in the Gaza Strip a worsening humanitarian crisis, in which Israel imposed a complete blockade cutting off the supply of energy, water, food and medicines.

Dr. Nasereddin added that the university is aware of its responsibilities outside the scope of education, at a time when it is necessary to stand by truth that cannot be overlooked, stressing that what the Palestinian in Gaza are being subjected to is a war crime for which the Israeli occupation must be held accountable.

He stressed the need to commit to supporting the victims of this unjust war, and that it is not logical to stand idly by and watch its results that are spilling the blood of our brothers and sisters in the Gaza. This helps alleviate the suffering caused by the war, and calls for a more peaceful and just world.

## Lawyer Muhammad Al-Qutaishat as Member of MEU's Board of Trustees

Amman - The Higher Education Council approved in its sixteenth session held on 19/2023/10/ the recommendation of the Board of Directors of the Middle East University, appointing Lawyer Muhammad Zuhair Qutaishat as a member of the Board of Trustees of the Middle East University for the Board of Directors category.

Al-Qutaishat had served as Director of the Media Commission and Legal Advisor to the prime minister.

The Board of Trustees of the Middle East University is chaired by Senate Dr. Yacoub Nasereddin, and consists of: The University President, Prof. Salam Al-Mahadin, Prof. Walid Khaled Abu Salama, Prof. Jibril Al-Khashman, Prof. Wissam Mohammad Hadi Al-Khatib, Prof. Aida Ahmed Al-Aeawamila, His Excellency Eng. Shehadeh Abdallah Abu Hadeeb, His Excellency Dr. Taleb Al-Refai, Dr. Sana Sheqwara, Dr. Adnan Al-A'raj, Dr. Amin Mohamed Yousef Amin, and Eng. Abdul Majeed Khader.

## MEU and YAN Industrial Trading Company Organize Breast Cancer Awareness Campaign in Cooperation with King Hussein Cancer Foundation

Amman – The Middle East University and YAN Industrial Trading Company, in cooperation with the King Hussein Cancer Foundation, organized an awareness campaign under the slogan "A picture of life ... Get checked" for the early detection of breast cancer, and its importance in achieving better treatment results and higher chances of survival, with a cure rate of up to 95%.

The campaign, which was witnessed participation from the Deanship of Student Affairs, the Faculties of Media and Pharmacy, and YAN representatives with their medical products, aimed to highlight the pivotal role that early detection plays in improving diagnosis and enhancing survival among women with breast cancer, which shows a proactive approach to their health.

The campaign included a multifaceted strategy, which focused primarily on the critical need for regular check-ups, as they serve as the first line of defence, reinforcing the ability to limit the progression of this serious disease.

The campaign showed that there is an urgent need to raise community awareness by dispelling myths and emphasizing the possibility of saving lives through early detection.

The awareness campaign comes from the university's and YAN's belief in the importance of being a partner with national institutions with regard to the health system. The campaign represents a call for a responsible humanitarian duty, especially when it comes to breast cancer, which affects 1 in 8 women.

## MEU Signs Cooperation Agreement with MadfoaatCom to Improve Students' Experience in Electronic Payment Field

Amman – The Middle East University has signed a cooperation agreement with MadfoaatCom to exchange experiences, cooperate in the field of financial technology, and integrate students into practical experiences on electronic payment systems. On behalf of the university, the signing was attended by the Dean of Student Affairs, Dr. Ayman Al-Khazaleh, and on behalf of MadfoaatCom, by its Director of Public Relations, Majdi Al-Aqeel.

In this regard, Dr. Al-Khazaaleh, in the presence of the Director of the Media and Public Relations Department, Kamal Freij, said that the university is aware of the increasing importance of such services, in an era when the majority of transactions are digital, stressing that the university is always looking to create a comfortable university environment for its students and affiliates.

For his part, Al-Aqeel, in the presence of the company's delegation, stressed that the importance of training FinTech students on electronic payments is essential in order to prepare them for the rapidly evolving financial landscape. He continued by saying that the current financial landscape requires a comprehensive curriculum that covers not only technical aspects, but the organizational, security, and user experience elements of electronic payments as well.
